

# Sacred Heart Hindsford R.C. Primary School

## Computing Intent Statement

Through our computing curriculum at Sacred Heart we aim to give our pupils the life-skills that will enable them to embrace and utilise new technology in a socially responsible and safe way. We want our pupils to flourish and to be able to operate in the 21<sup>st</sup> century workplace and we want them to know the career opportunities that will be open to them if they study computing. We want children to become autonomous, independent users of computing technologies, gaining confidence and enjoyment from their activities. We want the use of technology to support learning across the entire curriculum and to ensure that our curriculum is always accessible to every child. Not only do we want our pupils to be digitally literate and competent end-users of technology but through our computer science lessons we want them to develop creativity, resilience and critical thinking skills. We want our children to have a breadth of experience to develop their understanding of themselves as individuals within their community but also as members of a wider global community and as responsible digital citizens.
